Risk-Reduction Control

We know that many people are concerned about possible transmission of disease in mail offices; for the universal procedure we recommend by American Dental Association and OSHA, OTC hand gels; (dull) and instrument as a vehicle (high pressure steam treatment). Also a virus which is more or less attached as a readily portable cell is killed by chemical compounds. We use gloves, masks, and protective gear as for our patients as well as our patients.

We welcome questions about our facilities.
